EXPERIENCE

EventBeep, Pune — *Co-founder & CTO*

MAY 2019 - PRESENT

At EventBeep, I am responsible for all things at tech from building products, roadmap, teams to analytics. As an engineer, I architect and write reusable code, but as a tech leader, I build products and features that align with the vision of the company.

IBM, Bangalore — *Software Engineer*

JANUARY 2019 - MARCH 2019

Built an internal tool related to finance using Java and Spring boot. Here I became competent in working and collaborating with cross functioning teams and implemented Agile project management.

MyCaptain, Virtual — *Android Captain*

MARCH 2019 - DECEMBER 2019

Mentored around 5k students to teach the core concepts of mobile app development and tech in general. Up-skilling students were the main focus of these mentoring sessions.

Lemonop, Bangalore — *Software developer*

NOVEMBER 2017 - DECEMBER 2017

Built an admin panel to monitor the activity of users and other admin-level access using Node JS and React JS. Here I gained an understanding of working in startup culture and working in a small team.

EDUCATION

SASTRA University, Thanjavur — *B.tech (CSE)*

2015 - 2019 | CGPA - 7.9

Udacity, Virtual — *Nanodegree (Machine learning)*

2018 - 2018

KEY SKILLS

Flutter | NodeJS | MongoDB | AWS | Git | Typescript | Postgres | Rest API | GraphQL | Firebase | Golang | Agile | Figma

PROJECTS

Built flutter plugin for **Cometchat SDK** using Platform channels.

Clean architecture implementation in flutter using Rick and Morty GraphQL API.

Pagination package to simplify pagination of live Firestore data.

YellO app is a coupons and offers platform with multi-lingual functionality.

Kelunga is an audio streaming platform built with flutter and firebase.

LEADERSHIP OUTLOOK

Student ambassador at Google (DSC) in my University.

Executive member at Association of Computer Engineers in my University.

Secretary of Road safety patrol in my Higher Secondary School. Volunteer at JRC (Junior Red Cross Society).
